

## GBResequenece – Release Notes

Send questions and feedback using this link <http://granitebaysoftware.smartanswer.com/>

Be sure to select GBResequenece as the product or subject.

### 1.1.0

- Unlimited free license

### 1.0.20

- Fixed: File date/time was set incorrectly, now using LastWriteTime instead of CreationTime

### 1.0.17

- Changed: Thumbnails from Exif data are now correct aspect ration and don't show black letterbox bars at top and bottom
- Changed: Resequenced files now have the same date/time as the files they were copied from

### 1.0.15

- Fixed: Error would occur if trying to overwrite an existing file without permission checked.
- Added: If the output project folder is blank, an output folder will be created in the same parent directory as the input folder. The name will be the input folder name with the string “- Resequenced” appended to the end.

### 1.0.13

- Fixed: Object reference error if the ImageLog.xml file was present but was missing an image reference
- Fixed: Tv and Av values were not accurate when read from jpeg Exif data
- Added Graph option to the History Tab

### 1.0.12

- Fixed out of memory problem when loading a long sequence of .bmp files. Image preview was blank for some frames.

### 1.0.11 – 3/1/2011

- Initial release
